

Bio Hazard Clean Up

This course has been developed for those working for Councils, as well as clean up teams working on the aftermath of Events, Public Demonstrations and community projects.

With the increasing prevalence of drugs paraphernalia, toxic chemicals and other such hazards, staff and part time employees need protecting from the dangers of needle stick injuries and or the effects of toxic chemicals. The course underlines the need for protective equipment and demonstrates the correct way to collect and then dispose of in a safety and appropriate manner that ensures both the protection of the community and the Environment
